

RECAP' INSTRUCTIONS

The holidays have arrived, but that does not mean that we have to stop waste sorting! Little used products the rest of the year or different waste management depending on the place of holidays, it often becomes more complicated to keep the good reflexes on vacation.

The most present waste during the summer that can be sorted:

- Sunscreen spray (empty bottle): in the container "packaging";
- Cardboard packaging of inflatable toys: in the packaging container;
- Packets of cardboard cakes and cans: in the packaging container;
- Magazines, newspapers, game books (sudoku for example): in the container "Papers";
- Bottles of wine and bottles of beer: in the container "glass".

Some simple rules:

1. Discard your loose packages in the containers.
2. Do not nest them into each other.
3. No need to wash them before sorting them, just to empty them

WARNING ! Inflatable toys, plastic buoys, broken dishes ... are not packaging and are therefore to be deposited in the garbage bin.

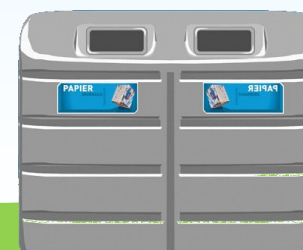

Non recyclable Waste

ONLY IN BLACK TRASH

Do not put
the waste
sorting
In holidays !
